SOFTWARE ENGINEER (FRONTEND)

Dynamic and dedicated Frontend Developer with expertise in Angular, ReactJS, and a proven track record of delivering high-performance web applications. I aim to leverage my skills and experience to contribute to innovative projects and grow with a progressive organization.

WORK EXPERIENCE

Frontend Developer | Cube Health Care System

Oct 2022 - present

- Designed and developed scalable web applications for healthcare solutions.
- Worked on PracticeFit, Practice Portal, Cube Client, and Denial Control modules, focusing on high performance and responsive UI.
- Collaborated with cross-functional teams to deliver end-to-end solutions, ensuring compliance with healthcare standards.
- Integrated advanced UI/UX practices using PrimeNG and Angular Material.
- Debugged and resolved performance bottlenecks in complex modules, reducing load times by 30%.

Frontend Developer | Soft Tech Master

Jan 2022 - Oct 2022

- Developed dynamic, interactive websites using ReactJS and Next.js.
- Optimized front-end components for enhanced user engagement and responsiveness.
- Participated in Agile workflows to deliver milestones on time.

SKILLS

- HTML, CSS, and JavaScript
- Bootstrap, Material UI, Tailwind CSS, SCSS, Primeng
- Libraries: React.js, Next.js
- Frameworks: AngularJS, Angular 14
- Responsive design
- Photoshop, figma
- Version Control: Git, GitHub, Bitbucket
- State Management: RxJS, NgRx
- Efficiency Under Pressure
- Critical Thinking
- Talented Customer Services

EDUCATION

Bs Computer Science | Aust University, Abbottabad

2015-2019

- Abbottabad University of science and technology
- Bs Computer Science passed with 2nd Division

Fsc Pre-Engineering | The Hallmark College, Havelian

2013-2015

- BISE Abbottabad
- I ended my matriculation in science subjects with first Division from A well reputed educational institute.

Matric Science | IPS

2011-2013

- BISE Abbottabad
- I Finished my intermediate in pre engineering subjects with first Division. From a well reputed educational board of the country

PROJECTS

Ar Tracker

A robust tracking system for managing accounts receivable in healthcare applications.

- Designed interactive dashboards for tracking payments and pending accounts using Angular.
- Streamlined data visualization using custom pipes for date and currency formatting.

Submission Form

A module designed for seamless form submissions in healthcare workflows.

- Built with Angular Reactive Forms, ensuring smooth validation and submission processes.
- Integrated interceptors for token-based authentication and request optimization.

Claim Form

A comprehensive module to handle UB04 and HCFA form submissions.

- Developed responsive forms with real-time validation.
- Automated data population from backend APIs to improve user experience.

Patient Hub

A centralized module to manage patient demographics and related information.

- Built reusable components to display patient details efficiently.
- Integrated APIs to fetch and update patient data in real time.

Auto Submission

Automated submission processes for various healthcare forms and workflows.

- Reduced manual intervention, improving efficiency by 40%.

Charge Master

A module for managing service charges and billing codes.

- Integrated a dynamic table for real-time addition and deletion of charges.

Eligibility

A module for verifying patient eligibility and benefits.

- Developed eligibility verification workflows using Angular and REST APIs.

PracticeFit

A healthcare management system that streamlines patient appointments, scheduling, and clinical workflows.

- Built and optimized user dashboards using Angular and PrimeNG.
- Enhanced scheduling features using Angular CDK for drag-and-drop appointments.

Cube Client Portal

A secure client portal for healthcare providers to manage their operations.

- Developed reusable components for enhanced maintainability.
- Implemented authentication and role-based access controls.

Practice Portal

An integrated platform for managing day-to-day practice operations in clinics.

- Designed a responsive interface for scheduling, billing, and reporting.

INTERESTS

- Reading, traveling, and video gaming.
- Exploring advancements in web technologies and AI.
